## **US-95 between New Meadows and Riggins now open for travel**

RIGGINS– ITD and many other interagency partners are pleased to announce that the hazardous incident on U.S. Highway 95 between New Meadows and Riggins has been cleared, and the highway is officially back open for travel.

On Thursday morning a propane truck overturned on the highway at milepost 177, rupturing the tank. First responders from multiple agencies worked both day and night to clean up thousands of gallons of propane, which is a highly flammable material, to allow the highway to safely reopen.

The department would like to thank everyone for their patience during the emergency response and wish travelers a safe drive to their final destinations. All travelers should continue to check [511.idaho.gov/](http://511.idaho.gov/) for conditions and closures on state highways and interstates.
